Project abstract:

In an era of globalization, island self-sustainability is threatened. This research proposal aims to examine the resilience of local food systems in Tahiti, French Polynesia, amidst the expansion of franchising. Specifically, it will investigate the challenges and opportunities faced by local food vendors and explore strategies for supporting and sustaining local businesses, using Vini Vini as a reference point.

An Assessment of Challenges and Opportunities Facing Local Food Systems in Tahiti, French Polynesia

The data collected will encompass qualitative insights from in-depth interviews with stakeholders, visual representations of actor-network diagrams mapping out the socio-technical dynamics, hierarchical structures of means-end chain analysis elucidating consumer preferences, observations and documentation from field investigations, and relevant information extracted from document reviews.

In dept

I will create diagrams for the actor-network and means-end chain analysis. The documentation and metadata will be accessible from the research paper.

Ethical considerations will be addressed by obtaining informed consent from participants, ensuring confidentiality and anonymity of data, respecting cultural protocols, and maintaining transparency in the research process, with continuous reflection and adaptation.

Question not answered.

Question not answered.

Question not answered.

All datasets, documenting the socio-technical dynamics, stakeholder interactions, consumer preferences, agricultural practices, and ecological conditions, hold significant importance for informing future studies, policy-making, and community interventions aimed at supporting and strengthening local food systems amidst globalization and franchising pressures. Furthermore, the documentation of methodologies, analytical procedures, and ethical considerations associated with data collection and analysis should also be preserved to facilitate transparency, reproducibility, and ethical integrity in future research endeavors in this domain.

Question not answered.

Question not answered.

Restrictions on data sharing may be necessary to protect the confidentiality and privacy of participants, particularly when sensitive information is involved, such as personal experiences, opinions, or business practices disclosed during interviews with stakeholders.

I, Bridget Bentley, will be responsible for maintaining the data.

Question not answered.
