

Plan Overview

A Data Management Plan created using DMP Tool

DMP ID: <https://doi.org/10.48321/D1C68B1FA1>

Title: Reimagining Education in the Pacific

Creator: Leilani Villaseñor - **ORCID:** [0009-0009-8748-8064](https://orcid.org/0009-0009-8748-8064)

Affiliation: University of California, Berkeley (UCB) (berkeley.edu)

Funder: Government of France (gouvernement.fr)

Template: Digital Curation Centre

Project abstract:

This project is designed in the prospect of reimagining and reconstructing education in French Polynesia, specifically on the island of Mo'orea as our focus site. The guiding question to all of this is: how can we reimagine and reconstruct education to reflect the values of the local community, in this case Mo'orea, as well as meet the needs of our changing environment? By prioritizing engaging with the local community, we aim to develop educational models that reflect Polynesian values and addresses the unique environmental and cultural context of the region.

Reimagining Education in the Pacific

Data Collection

What data will you collect or create?

- Conduct interviews and surveys to understand community knowledge, desires, and priorities.
- Community input and feedback.
- What gaps need to be filled skill-wise.
- Stakeholder motives.
- Resource availability.

How will the data be collected or created?

Surveys, interviews, focus group discussions, participant feedback, and participatory mapping exercises.

Documentation and Metadata

What documentation and metadata will accompany the data?

Video, audio recordings, transcripts, and written reports.

Ethics and Legal Compliance

How will you manage any ethical issues?

To ensure ethical integrity throughout our program, we are committed to principles of informed consent, cultural respect, confidentiality, equity, transparency, conflict resolution, continuous evaluation, and compliance with regulations. We will prioritize obtaining informed consent from all participants, respecting the cultural values and traditions of the local community, and safeguarding the confidentiality of personal information. Equity and inclusion will guide our efforts, ensuring equal opportunities for participation and representation. Transparency and accountability will be maintained through regular updates and feedback mechanisms, while conflicts will be addressed through open dialogue and mediation. Through these practices, we will uphold the highest ethical standards, foster trust, and achieve positive outcomes for the community.

How will you manage copyright and Intellectual Property Rights (IP/IPR) issues?

We will implement clear guidelines and protocols from the outset of our program. These will include obtaining appropriate permissions for the use of copyrighted materials, documenting the ownership of created content, and establishing agreements with collaborators regarding ownership and usage rights. We will prioritize respecting existing intellectual property rights while also ensuring that any new intellectual property generated during the program is appropriately protected. Transparency and communication will be key in addressing any potential copyright or IP/IPR issues, with mechanisms in place for resolving disputes and ensuring compliance with legal requirements. By proactively managing these issues as they occur, we plan to enable a culture of respect for intellectual property rights while facilitating innovation and collaboration within our program.

Storage and Backup

How will the data be stored and backed up during the research?

Google Drive.

How will you manage access and security?

Password protection.

Selection and Preservation

Which data are of long-term value and should be retained, shared, and/or preserved?

Historical records, traditional practices, ecological data, and community perspectives on education and cultural heritage.

What is the long-term preservation plan for the dataset?

Put it into the cloud as well as other relevant archives (online and physical).

Data Sharing

How will you share the data?

In every way desired - orally, slideshow-wise, formal reports, etc.

Are any restrictions on data sharing required?

We will adhere to established data management practices and ethical guidelines. This includes obtaining informed consent from participants regarding data sharing, anonymizing sensitive information to protect privacy, and securely storing data to prevent unauthorized access. We will also consider the potential risks and benefits of data sharing, balancing the need for transparency and openness with the protection of individual rights and confidentiality. Collaboration with trusted partners and institutions will be prioritized to facilitate data sharing in a controlled and ethical manner, while respecting any legal or regulatory requirements related to data protection and confidentiality. Ultimately, our goal is to maximize the value of the data while upholding ethical standards and safeguarding the interests of all stakeholders involved.

Responsibilities and Resources

Who will be responsible for data management?

Our team.

What resources will you require to deliver your plan?

Question not answered.

Planned Research Outputs

Model representation - "Our Education Redesign Plan Specific to Mo'orea"

Detailed analyses of community knowledge, priorities, and challenges related to education on Mo'orea will inform our output of comprehensive plans for reimagining and reconstructing education, developed in collaboration with community members through co-design workshops. This will also include assessments of our pilot educational programs, including feedback from participants, observations, and performance metrics.

Planned research output details

Title	Type	Anticipated release date	Initial access level	Intended repository(ies)	Anticipated file size	License	Metadata standard(s)	May contain sensitive data?	May contain PII?
Our Education Redesign Plan Specific to Mo'orea	Model representation	2027-06-29	Open	None specified		None specified	None specified	No	No
