UNDERSTANDING THE ROLE OF PHYSICIAN INTEGRATION WITHIN NURSING HOMES IN POST-ACUTE CARE OUTCOMES

Data sharing plan

Investigators seeking \$500,000 or more in direct costs in any year should include a description of how final research data will be shared, or explain why data sharing is not possible.

RESOURCE SHARING STATEMENT

This application requests support to collect research identifiable data for 350,000 Medicare beneficiaries admitted to nursing home for post-acute care. To protect confidentiality of these individuals we will not be able to share those data as per CMS regulations. However, full analytical codes (written using STATA software, College Station, TX) used to process the data will be made available to other researchers through the data sharing website of the University of Pennsylvania.

Additional data sharing requirements

More stringent data management and sharing requirements may be required in specific NIH Funding Opportunity Announcements. Principal Investigators must discuss how these requirements will be met in their Data Sharing Plans.

Question not answered.
