
mPING HMT Proposal

A Data Management Plan created using DMPTool

Creator: Kimberly Elmore

Affiliation: University of Oklahoma (OU)

Template: National Oceanic and Atmospheric Administration (NOAA)

The above plan creator(s) have agreed that others may use as much of the text of this plan as they would like in their own plans, and customize it as necessary. You do not need to credit the creator(s) as the source of the language used, but using any of the plan's text does not imply that the creator(s) endorse, or have any relationship to, your project or proposal

mPING HMT Proposal

Type of data and information created

Model output from the RAP, HRRR, NAM, and GFS forecast models at 1-3 h intervals in the native model resolution

mPING Observations

Profiles of Tw, T, U, V, p, geopotential, height

Predictors derived from the NWP model output

Expected schedule for data sharing

mPINGdata are available immediately based in the procedures outlined in <https://mping.ou.edu/>

Data archived in the 200 TB database, and the predictors associated with each mPING observation will be made available July 2020.

Standards for format and content

mPING data are available in JSON, GeoJSON, XML and ASCII formats

Predictors matched to mPING observations will be available in ASCII format

Archived NWP output data will be available in GRIB2 (native) format

Polices for stewardship and preservation

Data will be made available from NSSL and kept at NSSL on a 200 TB RAID system

NWP model data will be preserved for at least 5 y beyond the life of the project

All associated details about data format and any associated metadata will be kept in concert with the data itself

Procedures for providing access

Articles will be published in archive journals

Data will be made available via direct request to the project PIs

Data access will likely be through an API similar to that for mPING (<http://mping.ou.edu>)

These environmental data have not been formally disseminated by NOAA, and do not represent and should not be construed to represent any agency determination, view, or policy.
