

## Plan Overview

---

*A Data Management Plan created using DMP Tool*

**DMP ID:** <https://doi.org/10.48321/D10K5Q>

**Title:** Structural organization of rat tendon components under in vitro culture

**Creator:** Eli Heber Martins dos Anjos - **ORCID:** [0000-0002-9181-715X](https://orcid.org/0000-0002-9181-715X)

**Affiliation:** State University of Campinas (unicamp.br)

**Template:** UNICAMP-GENERICICO: Aplicável a todas as áreas

### Project abstract:

The present work proposes to investigate the structural organization of the components of rat tendons cultivated under *in vitro* culture conditions using high-performance polarizing microscopy techniques, cytochemical methods and image analysis. The evaluation of changes in the optical anisotropic properties of the collagen bundles and the nuclear phenotypes of the tenocytes will allow for organizational and macromolecular characteristics of these structures behave in organ explants.

**Start date:** 03-01-2019

**End date:** 03-01-2022

**Last modified:** 07-08-2024

### Copyright information:

The above plan creator(s) have agreed that others may use as much of the text of this plan as they would like in their own plans, and customize it as necessary. You do not need to credit the creator(s) as the source of the language used, but using any of the plan's text does not imply that the creator(s) endorse, or have any relationship to, your project or proposal

# **Structural organization of rat tendon components under in vitro culture**

## **Descrição dos Dados e Metadados**

---

### **Quais serão os dados coletados?**

- Polarization microscopy images
- Quantitative data on total birefringence and linear dichroism
- Image analysis data

### **Que metadados serão anotados e qual padrão será seguido?**

Data packages.

## **Aspectos Legais e Facilidade de Acesso aos Dados**

---

### **Quais são as questões legais e éticas associadas aos dados e relevantes a este projeto?**

Wistar rats aged 90 days will be used. The animal care protocol was approved by the Unicamp Institutional Committee for Ethics in Animal Experimentation (protocol no. 5064-1/2018).

### **Quais são as políticas a serem utilizadas para o compartilhamento de dados?**

Data will be shared in the official repository of Unicamp (REDU) using specific DOIs.

Raw data on total birefringence and linear dichroism generated from this research could be used without restriction for the sake of contributing with other investigations, provided that the original authors are cited.

For the use of data on images prior to their formal publication, approval from the original authors will be required. After the publication of these data, and depending on the journal where they are published, it is possible that they may be re-used, provided that the articles are cited based on Creative Common CC-BY license. It is possible that some restriction to data sharing occur due to the embargo period imposed by copyright of the scientific journals to which data are subjected.

## **Gestão de Dados e Armazenamento**

---

### **Em que formatos serão armazenados os arquivos resultantes da pesquisa em questão? Que software poderá ser utilizado para a manipulação de cada um dos formatos listados?**

Results of the research will be made available in digital form as PDFs (Adobe Acrobat), spreadsheet tables (XLS/XLSX - Microsoft Excel, Libre Office) and image files (JPEG, TIFF or PNG). The resulting manuscripts will appear as PDFs and contain text, calculations, drawings and images.

**Como e onde estes arquivos serão mantidos? Por quanto tempo ocorrerá esta preservação? Como será realizado o backup destes dados?**

Data from this research will be stored in the official repository of the University of Campinas (REDU/CGDP) and will get a specific DOI generated as unique and persistent identifier. They will be retained dependent upon storage capacity.

Data will also be stored in personal computers and external hard-drives of the researchers involved in the present study. In this case, storage will last up to 5 years after the end of the study.
