

## Plan Overview

---

*A Data Management Plan created using DMPTool*

**DMP ID:** <https://doi.org/10.48321/D18A536469>

**Title:** Examining the relationship between Stage 6 loadshedding and crime in South Africa through data analytics

**Creator:** Max Ospovat - **ORCID:** [0009-0004-6876-1807](https://orcid.org/0009-0004-6876-1807)

**Affiliation:** Iie Varsity College

**Funder:** The Independent Institute of Education (iie.ac.za)

**Template:** Digital Curation Centre

### **Project abstract:**

South Africa is frequently affected by Loadshedding which can have further effects on criminal activities across the country due to the blackouts. The purpose of this study is to investigate any possible relationships between Stage 6 loadshedding and criminal activity, in order to better understand this topic. This research can prompt further research into the topic in order to give government officials a better understanding of the relationship between loadshedding and crime in the country.

**Start date:** 03-01-2024

**End date:** 12-06-2024

**Last modified:** 05-12-2024
