Plan Overview

A Data Management Plan created using DMPTool

Title: HETEROGENEIDADE ESPACIAL ECOTOXICOLÓGICA DE METAIS E SUAS IMPLICAÇÕES EM RESERVATÓRIOS PAULISTAS (BRASIL) E PARA O LAGO TITICACA (PERU)

Creator: Ivan Biamont

Affiliation: São Paulo State University (unesp.br)

Principal Investigator: Ivan Biamont-Rojas

Data Manager: Ivan Biamont-Rojas

Funder: National Council for Scientific and Technological Development (cnpq.br)

Funding opportunity number: 190216/2017-4

Template: Digital Curation Centre

Project abstract:

Sediment cores were collected in two subareas in Puno Bay, Lake Titicaca, Peru. Sedimentation rates and metal concentration data were analyzed.

Start date: 12-31-2021

Last modified: 12-01-2022

The above plan creator(s) have agreed that others may use as much of the text of this plan as they would like in their own plans, and customize it as necessary. You do not need to credit the creator(s) as the source of the language used, but using any of the plan's text does not imply that the creator(s) endorse, or have any relationship to, your project or proposal.
HETEROGENEIDADE ESPACIAL ECOTOXICOLÓGICA DE METAIS E SUAS IMPLICAÇÕES EM RESERVATÓRIOS PAULISTAS (BRASIL) E PARA O LAGO TITICACA (PERU)

Data Collection

What data will you collect or create?

geochemical data

How will the data be collected or created?

sampling efforts in Puno Bay using a gravity sediment sampler.

Documentation and Metadata

What documentation and metadata will accompany the data?

Georeferencing data

Ethics and Legal Compliance

How will you manage any ethical issues?

There are no ethical issues in this study.

How will you manage copyright and Intellectual Property Rights (IP/IPR) issues?

There are no Intellectual Property Rights (IP/IPR) issues in this study.

Storage and Backup

How will the data be stored and backed up during the research?

Data will be stored in an external hard disk drive and backed up in the institutional account.

How will you manage access and security?

This is going to be controlled by the institutional account security.
Selection and Preservation

Which data are of long-term value and should be retained, shared, and/or preserved?

All data are of long-term value.

What is the long-term preservation plan for the dataset?

Data will be maintained in the institutional account.

Data Sharing

How will you share the data?

By URL link sharing

Are any restrictions on data sharing required?

There are not any restriction for sharing the content.

Responsibilities and Resources

Who will be responsible for data management?

The main author is responsible.

What resources will you require to deliver your plan?

Data
Planned Research Outputs

Dataset - "Titicaca profile sediment data"

Sediment cores were collected in two subareas in Puno Bay, Lake Titicaca, Peru. Sedimentation rates and metal concentration data were analyzed.
