Organizational Adaptation Mechanisms to Social Disruption

Interview Notes in Google Docs

Interview videos

Metadata for the interview

Interviews are conducted in a semi-structured way. There is a number of open questions that interviewer asks the interviewees and writes down their answers.

Standard flow of the interview is:

- 1) conduct the interview and make notes during interview
- 2) process notes without paraphrasing, group them into logical blocks
- 3) validate notes with the interviewees
- 4) get their informed consent to use the notes in the research and make them openly available

There are at least 3 versions of each interviews: a) unedited, b) edited, c) validated by the interviewee

Also there might (or might not) be a video recording of the interview

Every interview will have the following metadata:

- 1) date of the interview
- 2) type of the organization - commercial, military, non-commercial
- 3) approximate amount of people working in the organization
- 4) region of the country where organization is mostly located (if applicable)

All metadata of the interviews is collected in a Google Spreadsheet in the same folder in Google Drive

I will inform participants how I am going to use the data from the interview.

Then I will ask them sign a consent form.

Also it will be unethical to provide interview data to researchers from the countries that caused those disastrous events, specifically from russia and belarus. In this case I will turn down requests to access that data.

Question not answered.

All data will be store in a personal forlder on Google Drive

The data except video recordings will be backed up on my personal notebooks

I will manage access by granting or denying access to a corresponding Google Drive with dataset to a specific e-mail

The risks are unauthorized uses will be able to read, copy or modify the data.

This risk is managed by keeping data backups on the personal notebooks. Also logs and document version history will be kept.

After the articles are published and the thesis is defended, all corresponding interviews data will be archived and stored in the archive subfolders in the same folder of Google Disc

Video recording of the interviews will be deleted after the thesis is defended

Question not answered.

I will share my data by request.

I will give access to a corresponding Google Drive folder specifically for a researchers requested access, based on their e-mails.

The data is not allowed to be used by the researchers from the countries that attacked Ukraine, specifically from russia and belarus.

I will be responsible for granting or denying access to data.

Google as service provider will be responsible for data integrity of the data stored on Google Drive.

Question not answered.
