

## Plan Overview

---

*A Data Management Plan created using DMPTool*

**DMP ID:** <https://doi.org/10.48321/D11W6H>

**Title:** Research on Tensions Between Polynesians and French on Tahiti and Mo'orea

**Creator:** Sage Moloney - **ORCID:** [0009-0009-4468-1040](https://orcid.org/0009-0009-4468-1040)

**Affiliation:** University of California, Berkeley (UCB) (berkeley.edu)

**Funder:** University Of California Berkeley

**Template:** Digital Curation Centre

### **Project abstract:**

This research project will seek to answer the question: What are the sources of tension between native Polynesians and individuals from France on Tahiti and Moorea? In order to answer this question, I will be surveying individuals that identify as native Polynesians, as well as individuals that have moved to Polynesia from France.

## Research on Tensions Between Polynesians and French on Tahiti and Mo'orea

Questions will be prepared in order to best capture participants' perceptions regarding tensions between Polynesians and French. Prior to beginning the survey, these questions will be peer-reviewed to check for bias and to evaluate overall efficacy of the chosen questions in gaining insight to participants' views regarding the issue. Sample questions include: Do you feel that there is significant tension between native Polynesians and the French? How have you seen this tension manifest? When you have witnessed instances of tension between Polynesians and French, what were the circumstances and what was discussed?

Surveys will be conducted orally. Researchers will be stationed in a variety of places across Tahiti and Mo'orea, with an even distribution of rural and urban areas, as well as higher and lower income communities. Survey data will be anonymous, however occupation and economic status will be tied to participant responses for purposes of data analysis. Participants will be sorted into one of three economic categories: bottom 30%, middle 50%, and top 20%.

Information regarding survey participants' socio-economic status and occupation. Name of researcher who conducted the survey. Location of survey.

Data will be anonymous. No personally identifying information will be collected from participants.

Data will be owned jointly by researchers and University of California, Berkeley. Data will be available to anyone conducting similar research in the region with an interest in the topic.

Original copies of survey results will be kept, and photographs of survey data will be taken immediately following the completion of a survey. This photograph will be uploaded to the cloud. Data will also be periodically input into a spreadsheet, also backed up on the cloud.

Data will only be accessible to individuals pre-authorized as researchers or research assistants on the project. Access will be either password protected or SSO login protected.

All data

Question not answered.

Data will be compiled and published upon completion of research.

No.

Question not answered.

Question not answered.
